Find Your Perfect Color Mix

Designers are using every conceivable color combination to create distinctive exterior designs with a modern sensibility. You can do the same thing with your home. The optimum color blend has the power to bring out the best features of your home. Whatever your color goal is, CertainTeed can help you reach it.

CertainTeed Color Tools

CertainTeed has created a number of user-friendly visualization tools to help you get a better idea of how well different colors and styles work together.

ColorCoach™

A simple web-based tool that acts as a virtual color swatch book. You can save different combinations, use them in ColorView and share them via social media for second opinions.

ColorView® allows users to choose from a library of stock homes to create their own custom exterior using the many color, style and types of CertainTeed roofing and siding products.

ColorView® DIY takes ColorView to the next level in home exterior designing. You or your customers can upload a photo of their home, select the siding, roofing, and trim areas they want to update, and start exploring which CertainTeed products look best on their home.

Just like ColorView DIY, you or your customers can upload a photo of a home using **ColorView Pro**. But instead of masking the products onto the home yourself, our professionals will do it for you for a small fee.
